## Camlock Couplings

Camlock fittings which are also called groove or camlock couplings are a simple tool used to connect two hoses or pipes together in various industries so that one commodity can be transferred to another. Camlock fittings are significantly increasing in popularity because of the feasibility and advantages they provide to its users. Not only are they easy to install and use, but they also come at very affordable rates.

Various camlock types are depending on the hoses they need to connect. Each type may also provide unique functionality and have different diameters. Such diversity exists because of the diverse range of hoses that potentially need camlock couplings.

### Type A

Made with an adapter and a female thread.

### Type B

Made with a coupler and a male thread.

### Type C

Made with a coupler and a hose barb, aka a shank.

### Type D

Made with a coupler and a female thread.

### Type E

Made with an adapter and a shank.

### Type F

Made with an adapter and a male thread.

### Type DC

These camlock couplings are also available of types DP (dust plug) and DC (dust cap), which have a hybrid functionality.

### Type DP

Sizes	1/2"	3/4"	1"	1 - 1/4"	1 - 1/2"	2"	2 - 1/2"	3"	4"	5"	6"
Material available: Stainless Steel, Brass, Aluminium, Polypropylene.											

Our company's policy is one of continuous product innovation, and we reserve the right to change specifications without notice. Any such changes would benefit customers and be driven by our response to market requirements and changing specifications.
