Emjay 2" BSPT Poly Flow Bin Adaptor

Thread Conversion:

The primary purpose of this adaptor is to convert the thread on a Flowbin to a 2" BSP (British Standard Pipe) Female thread. BSP threads are commonly used for plumbing and industrial applications.

Ease of Installation:

The presence of octagonal nuts on both ends ensures that this adaptor is easy to install. You can tighten or loosen it by hand or using a spanner (wrench), making it convenient for users.

Material:

The adaptor is made from virgin material, which means that it is manufactured from new, unused plastic or other materials rather than recycled ones. This makes the adaptor very durable and less prone to wear and tear.
